

AP Physics Current Carrying Wires WS (MHS Badler)

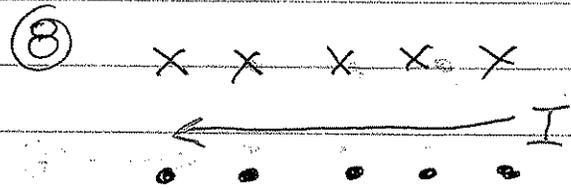

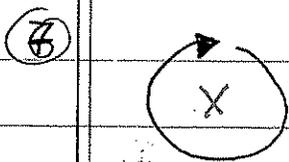

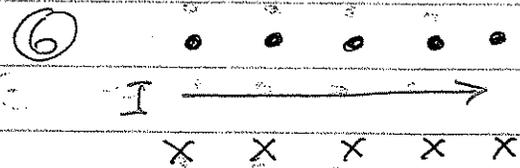

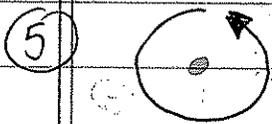

Name: Key

Date 3/13/12

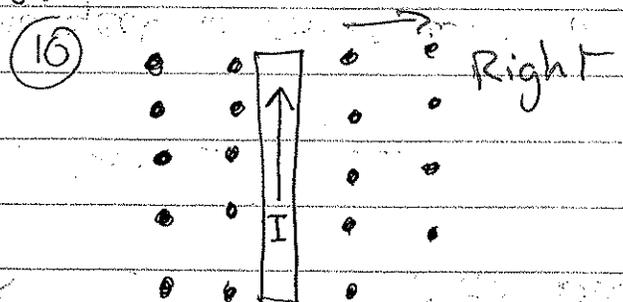

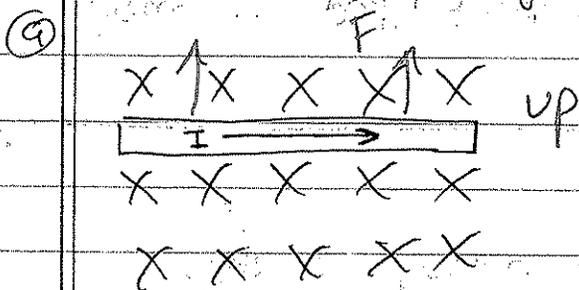

(1-4) The following pictures show the direction of conventional current. indicate the direction of the magnetic field that they cause.

(5-8) Indicate the direction of conventional current which would cause the following magnetic fields

Indicate the direction of the force experienced by these current carrying wires.

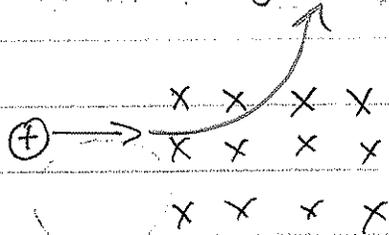

Name _____

Key _____

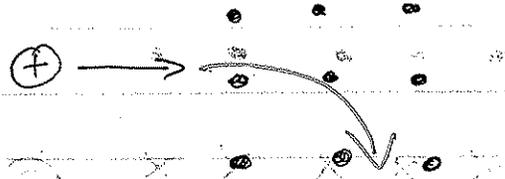

Date _____

Draw the path that the charged particle will move in the magnetic field.
